

Application Note:

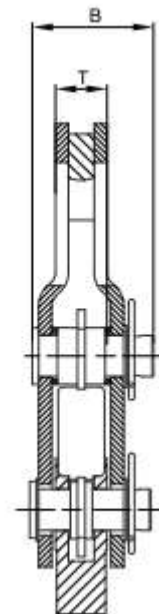

Using MHE Demag ZMS and EOD load cells with Soledigital equipment

Version 1.0, 13/08/2013

Overview

MHE Demag make a range of load cells for use with their wire rope and chain hoists. These are often preferable to third party load cells due to them being designed specifically for the equipment providing for more headroom and a neater installation.

The outputs from these cells is 0-20mV and they work well with all Soledigital loads sensing equipment.

Connecting to Liftlog or MaxOut

ZMS load cell	EOD Load cell	Function	MaxOut/Liftlog terminal
Green	Red	+ Excite	9
Yellow	Yellow	+ Sense	10
White	Blue	-Excite	11
Brown	Black	-Sense	12

Connecting to a HiBeam display
